Details

Boat ID	**s295012**

Technical data

Hull material	**aluminium**

Equipment

Other information

This text has been translated automatically.

QM B301

The B301 has a V-hull that keeps the boat stable and steady while sailing. The aluminium boat weighs 85 kilograms, which makes it very easy to handle, even as a dinghy. In addition, the V-hull means you use less fuel during your trip. The B301 is low-maintenance and features an additional railing.

Transport

The B301 is often used as a dinghy with another boat, but it can also be transported excellently on the roof of a car.

Motor up to 6 HP short shaft!

QM B301
The B301 has a V-hull that keeps the boat stable and steady while under way. The aluminium boat weighs 85 kilograms, which makes it very easy to handle, even as a dinghy. The V-hull also helps you use less fuel during your trip. The B301 is low-maintenance and features an additional railing.
Transport
The B301 is often used as a dinghy alongside another boat, but it can also be transported very well on the roof of a car.
