Hanse 400e: Performance, epoxy rigidity and modern comfort

The **Hanse 400e**, designed by the prestigious **Judel/Vrolijk & Co** studio, is an essential reference among performance cruisers. This **“e” version**, built with **epoxy lamination**, stands out for its **increased structural rigidity** and optimised weight, ensuring responsive sailing behaviour and **exceptional longevity** thanks to its natural resistance to osmosis.

This example in **3-cabin, 2-heads version** offers remarkable interior volumes, bathed in light. Equipped with a **self-tacking jib**, it allows smooth and efficient sailing, even with a **reduced crew**. Its **Yanmar 40 hp** engine (approximately 1,500 hours) ensures exemplary reliability for all your stopovers.

The Hanse 400e is the ideal sailboat for demanding owners seeking the perfect balance between **helm feel**, ease of handling and **modern liveability**.
