The Leopard 23 Sport is a prestigious open yacht, renowned for its sleek design, remarkable performance and Italian build quality by the Arno shipyard. At 23 metres in length, it perfectly embodies the spirit of luxury sport yachts, combining elegance, power and comfort for intense and refined cruising in the Mediterranean.

Its planing fibreglass hull, designed for speed, ensures excellent stability and impeccable seakeeping, even at high speed. The Leopard 23 Sport is powered by an exceptional twin-engine setup, with two engines each developing 1,200 horsepower, allowing it to reach high speeds while maintaining smooth and controlled cruising. This power is matched by comfortable range for fast passages between different ports of call, making this yacht a true concentrate of thrills and performance.

The outdoor spaces are one of the major assets of this model. The spacious, sheltered and perfectly arranged cockpit offers a true open-air living area, ideal for entertaining guests or enjoying convivial moments at sea. The large forward sunbathing area allows you to relax at anchor, while the swim platform makes access to the sea and water sports easy. Circulation around the boat is smooth and secure, enhancing everyday comfort on board.

Inside, the Leopard 23 Sport offers an elegant and functional layout. The cabins provide an excellent level of comfort, with well-thought-out volumes and high-end finishes. The interior saloon enjoys plenty of natural light and a warm atmosphere, ideal for relaxing after a day's cruising. The whole is designed to allow fast cruising with all the comfort needed on board.

In terms of equipment, this yacht features intelligent electrical system management with a 24 V 100 A battery charger and a 24 V 2,000 W inverter, as well as reversible air conditioning recently installed. The technical systems have been carefully maintained, including the recent replacement of essential pumps. The navigation electronics suite ensures simple and safe operation.

The Leopard 23 Sport is aimed at enthusiasts of high-performance yachts looking for an iconic, powerful and elegant vessel, offering unique thrills without compromise on comfort and quality of life on board. Since its refit, the Leopard 23 Sport has only accumulated 500 engine hours.
