Other information	**Additional Details**

Founded upon the ethos of continuous innovation and feedback from cruising clients, the new Leopard 45 sailing catamaran represents astute value, elegant lines and satisfies blue water passion.

With naval architecture by Simonis & Voogd Yacht Design, and with exterior and interior design by the world-class design team at Robertson and Caine, the Leopard 45 Sailing Catamaran not only builds on the best features of the current Leopard range, but most notably offers new exterior styling and enhanced interior accommodation.

The exterior styling has evolved from the more curvaceous deck features on the current Leopard range, into a sharper, more angular look, topped by a sleek new saloon hardtop, which extends from aft cockpit to forward cockpit.

Available in a 3 or 4 cabin layout, the Leopard 45 offers the perfect entertainment package with increased aft area with new layout, ergonomically designed open plan saloon and galley, larger forward cockpit, and more onboard area.

She’s sleek and nimble, yet comfortable. She incorporates a heritage of Leopards spanning twenty five years of production expertise.
The Leopard 45’s increased area, ergonomically designed open plan saloon and galley, increased forward cockpit and more onboard area make her the ideal catamaran for guest entertaining as well as long-range cruising.
Onboard entertaining is accentuated with ample dining space, and forward facing L shaped seating communicating directly with the galley, situated forward. Wide sliding saloon doors afford panoramic views towards the stern, allowing the interior saloon to flow naturally towards the outside aft and forward cockpit.
The boat is flooded with natural light during the day and after sunset, illuminated by subtle hidden lighting, with individual spotlights to highlight certain areas.
Designed for a modern, blue water lifestyle, the Leopard 45 features a raised helm station covered by a hardtop bimini, with direct access from the cockpit and side deck. All sailing lines lead to easily accessible winches, the primary winches being electric, and operated by footswitches.

In summary, the Leopard 45 Sailing Catamaran delivers uncompromised, exceptional build quality throughout, new, sleek styling, a sensible and practical layout, sailing comfort across all sea states, and features innovative technologies and multiple entertainment areas.
