This Midget 26 - Merlet is from the first owner and is in perfect condition.
The boat is exceptionally stable and seaworthy for its length. In addition, it has standing headroom and two cabins, which is quite unique for a boat of this length. There are few to no points of concern on the boat. The cushions are in good condition. The dining area can be converted into an extra sleeping berth for two people. This means the boat can accommodate a total of six people overnight.
Over the years, the Merlet has been maintained with great care and has been regularly upgraded. The most important upgrades concern the engine, sails, rigging, forestay and cockpit tent. The boat is hauled out of the water every year and stored in a shed.
At the moment, the mast has been removed due to passage under bridges and storage in the shed.
The Midget 26 is equipped with a wireless wind indicator and a Raymarine chartplotter. The boat also has its own lifting slings. Point of attention**:** the hot-air heating is currently not working. It was taken away for cleaning two years ago. A job for the next owner!
