Opis

This well-equipped example from 2003 has only around 630 engine hours and is powered by twin Volvo Penta KAD300 with Duoprop drives, which provides a combination of powerful performance, safe running and good fuel economy. In recent years, the boat has been upgraded with, among other things, a Garmin 12″ plotter with engine data and autopilot, new Alcantara cushions, lithium batteries with a complete Victron system, a portable solar cell solution and a new propeller and major service for the 2026 season.

The well-planned layout with two cabins, six berths and spacious social areas makes the boat equally suitable for quick day trips as for comfortable weekends and longer holidays. A very well-maintained and updated example of a model that is still considered one of Windy’s most highly regarded sports cruisers.

Equipment list

ENGINE & PROPULSION
• Bow thruster, new propeller 2026
• Major service done 2026
• Duoprop drive
• Stainless propellers
• Trim tabs
